Notes:

--FY16 state appropriation was cut \$73.4 million compared to prior year. The income fund was used to cover the shortfall.

--The ongoing cash deficit in the income fund is the result of the appropriation cut in FY16.

--The lack of state appropriation payments during FY16 and FY17 resulted in borrowing unrestricted cash from SIUE for three weeks during July 2017. No cash was actually transferred; it was a book transaction at the System level. Payments from the State resumed July 24, 2017, and eliminated the need for borrowing.

--Permanent budget cuts totaling \$19 million were taken in FY18, including \$10 million permanently cut from vacant salary lines across the campus.

--In FY18, 73% of expenses were incurred for salaries, wages and fringe benefits. Prior years were comparable.

--Between fall 2014 semester and fall 2018 semester, enrollment decreased 29%.
